Edwin Chapman, M.D.  
Medical Director  
Medical Home Development Group, LLC  
1647 Benning Road N.E., Suite 200  
Washington, DC 20002

Dear Dr. Chapman:

On behalf of Dr. Marcia K. McNutt, Chairman of the National Research Council, and Dr. Georges C. Benjamin, Chairman of the Health and Medicine Division, this letter extends to you an invitation to serve as member of the Committee on the Examination of the Integration of Opioid and Infectious Disease Prevention Efforts in Select Programs. Your appointment will commence immediately and will end on September 29, 2019. This appointment will be considered provisional until your completed Background Information and Confidential Conflict of Interest Disclosure (BI/COI) Form 3 has been reviewed and a discussion has been conducted with the full committee. If you have any questions about the form or the project, please call Rose Marie Martinez, Senior Board Director, at 202-334-2655.

The formal charge to the committee is to conduct a review of select programs to assess the extent to which opioid and infectious disease prevention programs are integrating the services they provide. The committee will identify and highlight programs that are achieving integration as well as barriers to integration. The committee may suggest strategies to address these barriers. Conclusions and recommendations from the committee will inform OHAIDP's existing and future projects that promote patient-centered, integrated programs to address the opioid and infectious disease epidemics. The Department of Health and Human Services (HHS), Office of HIV/AIDS and Infectious Disease Policy (OHAIDP) requests that the National Academies of Sciences, Engineering, and Medicine convene an ad hoc committee to conduct a review of select programs to assess the extent to which opioid and infectious disease prevention programs are integrating the services they provide. The committee will identify and highlight programs that are achieving integration as well as barriers to integration. The committee may suggest strategies to address these barriers. Conclusions and recommendations from the committee will inform OHAIDP's existing and future projects that promote patient-centered, integrated programs to address the opioid and infectious disease epidemics.

It is anticipated that the committee will meet several times via remote technology and one time in person over the course of the project. That meeting will be held May 6-8, 2019 in Washington,

Edwin Chapman, M.D.  
January 15, 2019

DC. You will be sent additional information about the first remote meeting in the upcoming weeks. We expect to deliver the committee's final report to the sponsor no later than September 27, 2019.

As a reminder, members of National Academies of Sciences, Engineering, and Medicine committees represent only themselves in the committee's deliberative process and not their affiliated organizations or other groups. Members also commit to observing the confidentiality of committee deliberations as well as the content of reports.

Our studies depend on the voluntary service provided by our committee members and other experts in the field under study. The committee's work will greatly benefit from your participation, and it is my sincere hope that you will accept this invitation to serve. Please return the Committee Acceptance/Declination Form, the BI/COI Form 3, and the Copyright Assignment Form in the enclosed envelope to Anna Martin by January 29, 2019.

Please accept my appreciation for your willingness to devote time and attention to accomplish this important task.

Sincerely,

Clyde J. Behney
